**SmartBridge MAC software**

V 1.0.1

1. Download the SmartBridge software from the MAC app store.

2. Once downloaded launch the app.
3. Click Edit and select "***Add SmartBridge ID***"

4. In the following window add the following credentials

   Device ID: This will be the Smartbridge ID number

   User Name: Enter the user name of the DVR (network user name on the DVR)
   **Password**: Password of the DVR (network user password on the DVR)

   Group: Add a name for the DVR. For Example: Home, Work, Ext.

   Click OK when completed.

   You will now be connected to your cameras

Smartbridge Help Link: Will re-direct you to www.firstalert.com

About Smartbridge: Gives you the version number

Preferences: This will allow you to change the default location to save your Snapshots

Hide SmartBridge: This will allow you to minimize the software.

Views: Will let you choose between 4,8,9,16,24 cameras

 Link and connect all camera(s)

Disconnect all camera(s)

Take screenshot of currently selected channel

PTZ controls
